#### Coverpage

##### Small photo (above):

The MultiSource® tumor radiation system from Eckert & Ziegler BEBIG GmbH is especially well suited for use in developing and newly industrialized countries.

Due to its long half-life, the Co-60 radiation source does not require frequent replacement. This considerably reduces logistical and administrative loads for clinics and the overseeing agencies.

##### Large photo (below):

In the third quarter of 2006, the IsoCord® prostate implant was successfully added to the list of remunerable products and services. Using the needle loading station, the prostate seed chains (lower photo) can easily be cut to the desired length.

## Dear Shareholder,

Eckert & Ziegler AG has once again posted record figures for the third quarter of 2006, with sales exceeding the 12 million EUR mark for the first time. This quarter thus represents the strongest three-month period in the history of the company and an increase of approximately 6% over the strong second-quarter results of 2006. In cumulative terms, business volume as of September 30 increased by around 20% over that of the year before, from 30 to nearly 36 million EUR. It is expected that the overall figures for 2006 will also clearly surpass last year's record sales of 41.8 million EUR.

The main engines for growth over the past nine months were the new Radiopharmaceuticals segment, which accounted for 3.6 million EUR of the total growth over last year's period of 5.8 million EUR, and the Therapy segment, which grew by 1.4 million EUR or 14 percent over last year. Implants for treating prostate cancer showed a particularly positive development, as did tumor radiation equipment due to a large-scale order from Venezuela. Incoming orders for the new Modular-Lab™ product family, which is part of the Radiopharmaceuticals segment, have shown a promising development. In the Nuclear Imaging and Industry segment, however, business volume did not meet expectations. It reached only roughly the same level as last year, with respectable increases for medical imaging products, calibration sources, and industrial radiation sources offset by sluggish sales of raw isotopes.

The latter, however, did not have a negative effect on profits, which showed a positive trajectory during these three months similar to that of the previous quarters. Following taxes and distribution to other shareholders, profits of approx. 0.7 million EUR or 0.22 EUR per share were posted, which means that the surplus following taxes and distribution to other shareholders increased to 2.1 million EUR or 0.67 EUR per share for the nine-month period. It thus lies substantially above the value for last year, which represented a surplus of 1.1 million EUR or 0.35 EUR per share for the same point in time. It also exceeds the record value of the nine-month period in 2004, which at 1.7 million EUR or 0.54 EUR per share, was based solely on balance sheet artifacts resulting from the deconsolidation of discontinued business sectors.

As in the previous quarters, the main profit engine was the Nuclear Imaging and Industry segment, which contributed around 2.1 million EUR to the net income after taxes and minority interest, while the Therapy segment posted earnings of around 0.6 million EUR. As expected, the Radiopharmaceuticals segment and the other company divisions yielded a combined loss of around 0.6 million EUR.

This loss is due in large part to expenses associated with the authorization of new radiopharmaceutical products. The loss is lower than expected, however, because clinical trials have been postponed for the main product <sup>224</sup>SpondylAT®, a radium 224-based drug for treating rheumatism. It has not yet been possible to reach an agreement with the authorization agencies regarding the study design or the number of patients to be included. Agreement is being held up by the fact that the two parties are currently presenting arguments at the Administrative Court regarding the withdrawal of the previous authorization for <sup>224</sup>SpondylAT®. Before a decision is made here, it will be difficult to finalize details for the clinical tests.

## Milestones

- The IsoCord® prostate implant is added to the list of remunerable products and services in France.
- Pharmtrace klinische Entwicklung GmbH, a commission-based research institute and a joint venture by Eckert & Ziegler AG and a group of experienced clinical developers, starts up operations in Berlin.
- Together with the Gläsernes Labor (Life Sciences Learning Lab) in Berlin-Buch, Eckert & Ziegler launches the "Science Garden" campaign, which aims to interest kindergarten teachers in experiment-oriented science courses and to improve the quality of kindergarten education.

The decision is expected in the fourth quarter, and as soon as it is made, segment management personnel will start talks with the authorization agencies and provide updated time and cost estimates. Until that time, the Group anticipates that the 2006 results following taxes and distribution to other shareholders will show an increase of more than 50% over 2005, and that without the burden of <sup>224</sup>SpondylAT® authorization, a result of around 1 EUR per share can be achieved in 2007.

### **Research and Development**

In the Nuclear Imaging and Industry segment, tests have been successfully performed on an X-ray system that can be used for rapid and economical inspection of freight on trucks for border security purposes. In addition, a number of prototypes for analyzing food products were produced, which are expected to be available on the market starting next year.

Work in the Therapy segment concentrated on further developing cancer radiation systems and on expanding the accessory portfolio. A prototype series for a new product for treating eye cancer was successfully produced. In the Radiopharmaceuticals segment, a number of technical components and applications were added to the Modular-Lab™ product range.

### **Staff**

The total number of employees throughout the Eckert & Ziegler AG Group increased over the close of 2005, reaching 299 on 30 September 2006 (30 September 2005: 258). The average number of employees over the first three quarters of 2006 was 291 (Q1–Q3/2005: 247).

### **Outlook**

The Board expects the fourth quarter to show lower surpluses than the previous three quarters, because profit-sharing payments will be due and provisions and adjustments will be made for the annual accounts. The combination of high delivery volumes in the third quarter and the upcoming winter holidays is also expected to lower sales and thus the gross margin. In sum, the surplus after taxes and distribution to other shareholders is expected to be around 2.5 million EUR or approximately 0.80 EUR per share. With estimated interest levels of 0.8 million EUR, this would mean an EBITDA of approximately 9.2 million EUR and an EBIT of around 4.9 million EUR.

Regarding sales, the targeted mark of 50 million EUR for 2006 will probably only barely be met due to sluggish sales of raw isotopes. This would amount to an increase of around 18% over last year.

## **Balance Sheet**

The balance sheet does not show any major changes vis-à-vis the previous quarter. The largest changes derive from trade account receivables, which increased by approximately 0.9 million EUR, as well as from short-term loan liabilities, which were reduced by approximately 0.8 million EUR. The capital ratio remained constant at 55%. Eckert & Ziegler AG's share in Pharmtrace klinische Entwicklung GmbH (see also the press release of 13 September 2006) will be listed on the balance sheet under financial investments, because the amount of holdings means that only an at-equity consolidation will be done.

## **General Accounting and Valuation Methods**

This unaudited Group Interim Report for the third quarter of the 2006 business year comprises the reports from Eckert & Ziegler Strahlen- und Medizintechnik AG and its subsidiaries (also "Eckert & Ziegler AG" below).

Eckert & Ziegler AG's Group Interim Report of 30 September 2006 is published in accordance with IFRS. Group interim reports up to and including those of 2005 were prepared in accordance with the Generally Accepted Accounting Principles valid in the United States of America (US-GAAP). For purposes of comparison, last year's figures included in this Interim Report have been converted in accordance with IFRS.

Eckert & Ziegler AG's Group Interim Report of 30 September 2006 was produced in accordance with the International Financial Reporting Standards (IFRS). It takes into account all standards stipulated for application in the EU on that date by the International Accounting Standards Board (IASB) in London, as well as official interpretations by the International Financial Interpretations Committee (IFRIC) and/or the Standing Interpretations Committee (SIC).

The same accounting and valuation methods were applied to the Interim Report as to the Group Financial Statement of 31 December 2005.

To prepare Group interim reports in accordance with IFRS, it is necessary to make estimates and assumptions about the level and extent of the assets, debts, revenues, and expenditures on the balance sheet. The actual values can deviate from the estimates. Major assumptions and estimates are made for useful lives, obtainable revenues from fixed assets, viability of outstanding accounts, and accounting and valuation of provisions.

This Interim Report contains all the information and adjustments needed to acquire a view of the asset, financial, and profit situations of Eckert & Ziegler AG corresponding to actual conditions at the time of the Interim Report. Sub-year results for the ongoing business year cannot necessarily be used to derive conclusions about the development of future results.

### Consolidation Cycle

Eckert & Ziegler AG's Group Interim Report includes all essential companies for which Eckert & Ziegler AG is able to directly or indirectly determine financial and business policy (control function). Between 31 December 2005 and 30 September 2006, there were no changes to the consolidation cycle, so the companies included in the Interim Report of 30 September 2006 are the same as those in the Group Financial Statement of 31 December 2005.

### Currency Conversion

Financial statements for subsidiaries outside the European Currency Union are converted in accordance with the notion of functional currency. A modified closing rate method is applied for all companies. Assets and debits are converted using the mid-rate on the date of the statement, and equity capital is converted using historical rates. Profit and loss statement items are converted by means of the weighted average for the period.

The following exchange rates were used:

Country	Currency	Exchange rate on September 30, 2006	Exchange rate on September 30, 2005	Average rate for the period January 1 – September 30, 2006	Average rate for the period January 1 – September 30, 2005
USA	US\$	1.268800	1.204800	1.256296	1.257679
Czech Republic	CZK	28.333300	29.645300	28.420394	29.961649

### Significant Events

No significant events have occurred after the first nine months of the 2006 business year.

### Limited Comparability of this Group Interim Report with Last Year

Eckert & Ziegler AG and/or its subsidiaries acquired a number of companies during the 2005 business year. This substantially affected the Group's asset and profit situations, which makes it difficult to compare this Group Interim Report with that of last year.

### Number of Own Shares

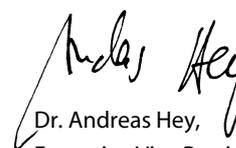

As of 30 September 2006, Eckert & Ziegler AG held 111,835 of its own shares.
