Q3 results in-line – Fundamentally undervalued with 36% upside

CC at 4:00 PM CET (+49 6103 485 3001, ID 437 615)

Q3 sales are up **10.6% yoy** at **€ 28.2m (€ 25.5m)** and are **1.4% better** than expectations. **Isotope Products** (46% of total) were down 1.6% yoy, and in-line with expectations: a strong performance in the Isotrap division with the sale of reference and calibration sources could partly compensate a weaker oil-drill bit business due to raw input bottlenecks on world markets. **Therapy sales** (27.3 % of total) were slightly weaker than expected and up 1.4% yoy. While standard titanium seeds for the treatment of prostate cancer are facing pricing pressure, the company is registering strong acceptance for **after-loaders** particularly in emerging markets, with a slow-decaying source allowing for safe transport. **RadPharma** sales (21.3% of total) are slightly better than expected and up 29% yoy vs. +11% for the first 9 months, thanks to shipments of modular-labs used to generate radioactive isotopes on-site, and contrast agent shipments, particularly to Poland, out of the company's European cyclotrons. Overall the strong yoy sales performance confirms the secular growth story at EUZ: demographics, growing importance of diagnostics in Western markets seeking to contain healthcare cost inflation, growing need for traceability in drug discovery.

The gross margin is up 3 pts yoy at 53% with gross profit 6% better than expected, given strong pricing power particularly on calibration sources following the acquisition of competitor Nuclitec in 2009. We increase gross margin to 52.5% vs. 51.5% currently and maintain numbers unchanged, given R&D cost inflation in the remainder of 2010 and beyond (certification processes in Russia and for plastic smart seeds).

Q3 EBIT is up **87.8 % yoy** at **€ 5.6 m (€ 3.0m)** and 12% better than expectations thanks to better cost control following the integration of Nuclitec (€ 1m restructuring charges in Q3 09). Net profit is 4% better than expectations and has quasi doubled yoy following the acquisition of a further 34% stake in IBT in Q2 2010, substantially cutting minorities.

CFO is down **23% yoy** at **€ 9.2m**. Changes in receivables increased by € 3.4m as the RadPharm division discontinued most of its factoring program. We slightly adjust working capital going forward as a result.

2010 guidance is maintained at € 105m in sales and a net income of € 9.5m. This would imply Q4 net income of € 1.6m, down 40% sequentially yoy, and is hence conservative. Accelerating R&D in Q4 and tax issues could explain that.

Remains a BUY, PT € 35.00 on Adjusted Free Cash Flow Yield 2011E. The stock trades at PE of 12x 2011 earnings, 6.3x EV/EBIT, and remains fundamentally undervalued.
