

2004

Quarterly Report I

MultiSource®

Dear Shareholder,

The first quarter of 2004 was marked by brisk acquisition activity, which brought four additional sales and revenue sources into the corporate group. Two of the acquisitions involve products oriented primarily to radiation therapists, and thus fall in the oncology segment. One is the radiation equipment division of the French company CIS bio international, comprising low-dose-rate afterloader (cesium radiation equipment) and therapeutic iridium radiation sources. The other is the medical equipment business of HEK GmbH in Lübeck, which brings items such as a newly developed high-dose-rate afterloader (iridium and cobalt radiation unit), patient placement equipment, and collimator cutting units into the portfolio. In the Nuclear Imaging and Industry segment, the purchase of more shares of Isotope Products Europe Blaseg GmbH (IPE), Waldburg allows Eckert & Ziegler AG to centralize various sales and administrative activities over the medium term. And finally, acquisition of the raw material broker CNL Scientific Resources International, San Francisco, brings vertical integration to strengthen the activities of our American subsidiary Isotope Products Laboratories Inc. (IPL).

As for the figures: Sales in the first quarter of 2004 rose to 8.0 million EUR, a marked growth of 17% over the same quarter of last year which is all the more noteworthy given that the exchange rate for the dollar – and thus the amounts invoiced in US\$ – dropped by 16% over the last twelve months. Of the

1.2 million EUR increase in sales, approximately 0.5 million EUR are based on the newly acquired units but the rest is due to organic increases in the segment Oncology and Cardiology. In addition to satisfying sales of implants for treating prostate cancer, invoices for equipment orders were the driving force here. Nominal sales in US\$ for the industrial and nuclear medicine segment – not counting acquisitions – were at the same level as last year.

All revenue figures showed considerable increases, but it is difficult to compare them with last year owing to the fact that exchange rate fluctuations and major changes in accounting regulations (affecting e.g. the NEMOD consolidation as well as the handling of taxes and reserves) must also be considered. They led to leaps of over 10,000% in operating profits, and to an increase of roughly 25 percent even in revenues from ongoing activities. For net income after taxes, this quarter's profit of 0.4 million EUR contrasts with a loss of 0.5 million EUR in the same quarter of last year. Although the figure corresponds to an increase of about 0.14 EUR per share for this quarter already, the board continues to project a net profit of approximately 0.40 EUR per share for the full year.

As is to be expected for a quarter with intensive acquisition activity, the level of liquid funds declined from the end of 2003. Company acquisitions and additions of near-money securities amounted to a total level of 5.5 million EUR, but were offset only by payments of

about 2.6 million EUR. The reason behind this moderate reduction in liquidity is the ongoing high cash flow from operational activities, which increased by 47% over the same quarter of last year, as well as the fact that treasury shares were used for part of the acquisitions. From the other balance sheet items, it is clear that longer inventory and payment periods must be expected for the investment products recently acquired (afterloaders, blood radiation equipment) than for our main business thus far.

Research and Development

In the oncology segment, final acceptance of the production facility for prostate implants sold to Theragenics Corp. was successfully concluded. For the new form of stranded prostate seed IsoCord®, the production plant was expanded to handle larger unit volumes.

Staff

As of 31 March 2004 the total number of staff employed by the corporate group was 186.

Milestones

- Acquisition of the radiation equipment segment from CIS bio international, France.
- Conclusion of a multiple-year cooperation agreement for prostate seeds with the Institut Curie, France, at a value of nearly 2 million EUR.
- Majority acquisition of the sales subsidiary Isotope Products Europe Blaseg GmbH (IPE), Waldburg, Germany.
- Acquisition of the raw material broker CNL Scientific Resources International, USA.
- Takeover of the MMI medical equipment division of HEK GmbH, Lübeck, Germany.
- DRAXIMAGE Inc. becomes distributor for nuclear medical products in Canada.
- Contract signed for distribution of dendritic cells in Japan.
- Professor Detlev Ganten resigns from the Supervisory Board.

Outlook

In the coming quarters, the board of Eckert & Ziegler AG and management personnel from the subsidiaries will concentrate on integrating the newly acquired companies. The management expects only slight earning contribution from these commitments this year, on account of the integration costs and the fact that synergy effects will only start yielding results in subsequent quarters. The first full consolidation of the new units, however, will generate a further increase in sales in 2004 already.

In the summer, delivery of another production facility is expected as planned.

In early April, our customer Novoste Corporation (Atlanta) informed us that it will be restructured and that it will cease to purchase cardiovascular radiation sources. This decision does not affect guaranteed sales. Because we can no longer expect significant sales of products for prevent-

ing restenosis, we will change the designation of our "Oncology and Cardiology" segment to the more appropriate "Radiation Therapy" (Therapy).

Dr. Andreas Eckert,
Chairman of the Management Board

Gerald Pohland, Board Member

Dr. Edgar Löffler, Board Member

Berlin, April 30, 2004

Accounting and Valuation Methods

See also the information in the 2003 annual report on the accounting and valuation methods.

Following the majority acquisition of Isotope Products Europe Blaseg GmbH (IPE), both it and CNL Scientific Resources International will be fully consolidated as of 1 February 2004.

Initial consolidation of MCP Medical International GmbH (MMI) took place on 31 March 2004. In addition to the purchase price paid thus far, the contract calls for a further sales-dependent purchase price component in addition to the payments already done. This component cannot be precisely determined at present, so the final purchase price is subject to change, also with respect to upcoming review by our auditors. Possible changes here would affect a number of balance sheet items.
