The official version of this quarterly report is in German. The English translation is provided as a convenience to our shareholders. While we strive to provide an accurate and readable version of our quarterly report in English, the technical nature of a quarterly report often yields awkward phrases and sentences. We understand this can cause confusion. So, please always refer to the German quarterly report for the authoritative version.

Business development of the Eckert & Ziegler Group

Revenue growth

In the first nine months of 2009, the Eckert & Ziegler Group set new records with sales of EUR 78 million and Group profits of EUR 5.3 million, thus far exceeding the existing operative records. Compared with last year's period, sales increased by EUR 26 million, or 51%. Compared with the same nine-month period in the previous year, the profit after tax and minority interests increased by EUR 2.4 million, or 79%, if the special effect resulting from the IBt consolidation in that period is excluded. The profit per share for the three quarters of 2009 taken together equals EUR 1.44.

This enormous success is based on the very positive figures from all three operative segments. Sales in the therapy segment have increased by 26%, or approx. EUR 5 million. The drivers of growth were above all the tumor irradiation equipment, sales of which increased by 55%, or about EUR 2 million, due in particular to increased sales to eastern Europe. The first sales from the Russian project amounting to about EUR 3 million were already included in the second quarter of 2009. International Brachytherapy s.a. (IBt), an associated company of Eckert & Ziegler, had in the first half of the year set up a joint venture with a Russian state fund corporation to manufacture prostate cancer implants in Russia, and had begun supplying plant and equipment.

In the Nuclear Medicine and Industry segment, sales have almost doubled from EUR 22.2 million to EUR 39.6 million. This resulted from the combined effects of including the Nuclitec sales, the increased sales of robust drill hole sources, and a USD exchange rate improvement of 6%.

Despite the loss of sales in Italy, the Radiopharmaceuticals segment grew by 38%. The two main product categories, Modular-Lab and diagnostics for positron emission tomography (PET), continued their uninterrupted growth trend from the previous quarters. Added to this were Nuclitec's aurigamedical sales.

Earnings position

The Therapy segment is turning into an earnings machine. Last year's restructuring costs had a detrimental effect, resulting in only a very modest profit. Now, however, this highly profitable operational business is making a decisive contribution to increasing Group profits. In addition, the start-up of the Russian project already provided additional profits in the second quarter.

The Nuclear Medicine and Industry segment was still the main sources of revenues, just as in previous periods. Sales have increased by 79%. Approximately a third of that, i.e. 25% growth, can be seen in profits after tax and minority interests, which have increased by EUR 0.9 million compared with the same period last year and which now stand at EUR 4.3 million. The results also show that Nuclitec had been integrated successfully and was likewise turning in profits.

The Radiopharmaceuticals segment continues to make a profit despite high launch costs for introducing new products. Gains from the deconsolidation of the Italian stake further increased profits.

The Other segment includes the costs of the holding company which was faced with high lawyer fees in connection with the IBt lawsuit during the current financial year.

The brief segment statistics on the following page (in thousands of euros) illustrate the sources of turnover and profit.

Liquidity

The superlative key figure of the first nine months of 2009 is the operative cash flow of EUR 12.0 million, which also sets a new record. Although earnings for the period declined compared to the previous quarters, the operating cash flow continued to increase, and amounts to EUR 5.5 million in the third quarter of 2009 alone.

	Q1-3/2009	17%	11%	1%		10%
Turnover growth	absolute	+4,961	+17,467	+3,945		+26,373
	in %	+26%	+79%	+38%		+51%
Profit growth	absolute	+3,561	+820	+782		+4,468
	in %	+747%	+22%			+126%

As each segment has different minority interests, profit after tax was used as a reference. The figures for 2008 have been adjusted to compensate for the special effects of the IBt consolidation.

A comparison with the first three quarters of 2008 is not very informative because in the comparison period the non-cash effects were dominant, but only a slight operational cash inflow was posted. This is in stark contrast to 2009, where the cash flow from business activities is above the profit figure for the period, which itself is very high.

The main reason for this success lies in the fact that, despite the huge increase in sales, receivables were able to be reduced once the payment of the first Russian project turnover, which was only made in October, is disregarded. Inventories were also able to be reduced. Only the reduction of accounts payable led to liquidity outflows.

The investments of EUR 8.2 million for the Nuclitec shares, less the cash reserves, and in property, plant and equipment were largely financed by the capital increase and by taking out loans totaling EUR 5.1 million. This means that the cash gain from the operative capital flow of EUR 12.0 million was reduced by a total of EUR 3.1 million from investments and financing. The dividend payment of EUR 1.1 million is also to be deducted, as well as the change due to the purchase/issue of EUR 0.2 million own shares. Overall, the cash reserves increased by EUR 7.5 million to EUR 14.8 million on September 30, 2009.

Research and development

Work in the Therapy segment concentrated on the development of a complete plant for the production of prostate cancer implants for Russia. The specification was finalized for most of the plant's modules, and the actual development phase was begun.

The range of accessories for the cancer irradiation devices was expanded with improved applicators for use in treating breast cancer and new Fletcher applicators for use in gynecology.

In the Radiopharmaceuticals and the Nuclear Medicine and Industry segments, the focus was on the ongoing further development of existing product lines.

Staff

As of September 30, 2009, the Eckert & Ziegler Group had 348 employees in Germany, and a total of 519 employees worldwide. Compared with the end of 2008, the number of staff increased by 110 (December 31, 2008: 409). This increase is mainly due to the inclusion of the Nuclitec companies.

Outlook

The sales target for the 2009 financial year is EUR 100 million. The Executive Board is maintaining its profits forecast of EUR 6.6 million (EUR 1.80 per share), although this figure does not include any special effects of the whole or partial reversal of provisions in connection with the legal dispute regarding IBt (EUR 7.1 million).

3/2009

Milestones

- The 628,633 shares from the increase in capital decided upon in January 2009 were authorized for trading in the regulated market (Prime Standard) of the Frankfurt stock exchange.
- International Brachytherapy S.A. (IBt), an associated company of Eckert & Ziegler AG, has supplied the 100th MultiSource® Co-60 HDR (High Dose Rate) cancer irradiation device. The Vajira Hospital in Bangkok, Thailand will use it principally to treat tumors of the uterus, breast and esophagus.
- Eckert & Ziegler awarded the EANM Eckert & Ziegler Abstract Award to five nuclear medicine researchers for their outstanding scientific work. The award ceremony took place at the annual congress of the European Association of Nuclear Medicine in Barcelona.

1. General information

These unaudited interim consolidated financial statements as of September 30, 2009 comprise the financial statements of Eckert & Ziegler Strahlen- und Medizintechnik AG and its subsidiaries (also referred to hereinafter as "Eckert & Ziegler AG").

2. Accounting and valuation methods

The consolidated financial statements (interim financial statements) of Eckert & Ziegler AG as of September 30, 2009, have been prepared, like the annual financial statements for 2008, in accordance with the International Financial Reporting Standards (IFRS). All of the standards of the London-based International Accounting Standards Board (IASB) which were applicable in the EU on the balance sheet date, as well as the relevant interpretations of the International Financial Reporting Interpretations Committee (IFRIC) and the Standing Interpretations Committee (SIC), have been observed. The accounting and valuation methods described in the appendix to the annual financial statements for 2008 have been applied unchanged. For the preparation of the consolidated financial statements in compliance with the IFRS, it is necessary for estimates and assumptions to be made that impact on the amount and disclosure of recognized asset values and liabilities, income and expenditures. The actual values may differ from the estimates. Significant assumptions and estimates are made concerning useful lives, earnings attainable from goodwill and non-current assets, the realizability of receivables, and the recognition and measurement of provisions. This interim report contains all of the necessary information and adjustments required to produce a picture which reflects the actual circumstances in respect of the assets, financial situation and earnings position of Eckert & Ziegler AG at the time the interim report was produced. The earnings achieved during the course of the current fiscal year do not necessarily allow conclusions to be drawn about the development of future earnings.

3. Companies included in the consolidation

In the consolidated financial statements of Eckert & Ziegler AG, all companies are included where Eckert & Ziegler AG, either indirectly or directly, is able to determine the financial and business policies (control concept).

Company acquisitions and disposals

On January 23, 2009, Eckert & Ziegler AG exercised the purchase option it obtained in December 2008 and purchased all the shares in nuclitec GmbH in Braunschweig, its American subsidiary nuclitec Inc., and the French sister company nuclitec s.a.r.l. The purchase price for the shares amounted to EUR 6,859,000. The ancillary purchase costs amount to EUR 35,000. At the time of publishing this interim financial report, the data gathering required for identifying and evaluating the asset values, debts and potential debts was not yet complete. For this reason, the initial accounting for the acquisition of the company could only be carried out provisionally in accordance with IAS 3.62 at the end of the interim financial statement period.

The acquisition of nuclitec GmbH and its American subsidiary, nuclitec Inc., will be recorded on the balance sheet in this interim financial statement with the following provisional figures:

	Book values	Fair value*
	TEUR	TEUR
Non-current assets	5,636	9,709
Current assets	11,329	11,329
Non-current debts	-14,080	-15,366
Current debts	-4,076	-4,076
Net assets	-1,191	1,596
Acquisition costs		6,158
Goodwill		4,562

* The calculation of the fair values of the assets and debts is not yet completed. Therefore provisional values have been used in accordance with IFRS 3.62.

The acquisition of nuclitec s.a.r.l. will be recorded on the balance sheet in this interim financial statement with the following provisional figures:

	Book values	Fair value*
	TEUR	TEUR
Non-current assets	2	2
Current assets	1,057	1,057
Non-current debts	-398	-398
Current debts	-287	-287
Net assets	374	374
Acquisition costs		736
Goodwill		362

* The calculation of the fair values of the assets and debts is not yet completed. Therefore provisional values have been used in accordance with IFRS 3.62.

In March 2009, Eckert & Ziegler AG sold its Milan subsidiary Eckert & Ziegler f-con Pharma Italia s.r.l. (FCI) to the Italian company A.C.O.M. – Advanced Center Oncology Macerata SPA. The deconsolidation of FCI resulted in non-cash revenue of EUR 97,000 in the present interim financial statement.

4. Limited comparability of group financial statements with the previous year

In 2008, Eckert & Ziegler AG invested the Therapy segment business in IBt S.A., Seneffe (Belgium) and, in return for this, received 38.5% of the ordinary shares (which equates to 29.9% of the voting shares) in IBt S.A. arising from a capital increase and the loan-related claims. In June 2008, Eckert & Ziegler BEBIG GmbH took over the implants manufacturer Isotron

Isotopentechnik GmbH. In January 2009 the shares of the companies nuclitec GmbH, nuclitec s.a.r.l. and nuclitec Inc. were purchased. In the first quarter of 2009 the shares in Eckert & Ziegler f-con Pharma Italia s.r.l. were sold.

Compared with the first nine months of 2008, this has impacted substantially on the financial situation and earnings position of the Group, which means that it is difficult to compare the Group report with the previous year's report.

5. Currency translation

The financial statements for the companies outside the European Monetary Union are translated based on the concept of functional currency. The following exchange rates were used for the currency translation: See table below

6. Portfolio of own shares

As of September 30, 2009, Eckert & Ziegler AG held 140,916 own shares. This equates to a share of 3.6% of the Company's nominal capital.

7. Substantial transactions with affiliated persons

In respect of the substantial transactions with affiliated persons, we refer to the publications made in the consolidated financial statements dated December 31, 2008.

Country	Currency	Exchange rate on Sep. 30, 2009	Exchange rate on Dec. 31, 2008	Average rate: Jan. 1 - Sep. 30, 2009	Average rate: Jan. 1 - Sep. 30, 2008
USA	USD	1.4592	1.4097	1.3606	1.4398
Czech Republic	CZK	25.2204	26.6426	26.9679	24.6554
Great Britain	GBP	0.9166	0.974	0.8872	n.a.
Sweden	SEK	10.2247	10.9861	10.7215	n.a.

8. Events of special significance

Eckert & Ziegler Strahlen- und Medizintechnik AG has been commissioned to produce an innovative cancer medication for the American drug developer Molecular Insight Pharmaceuticals (NASDAQ: MIPI) based in Cambridge, MA. Under the terms of the agreement signed on October 21, 2009, Eckert & Ziegler will set up a new production plant for this purpose over the next few years at its Braunschweig location with financial support from MIPI. The compound Onalta® is a novel radiotherapeutic product candidate under development for the treatment of neuroendocrine tumors. The production plants will be used both for the manufacture of test batches for clinical development and, later, for the manufacture of the approved radiopharmaceuticals.
