Ac-225 production kicks off, GMP validation to follow

Yesterday, **EUZ announced to have successfully started Ac-225 production** in its Czech facility, which marks a major milestone considering the high technological complexity of the manufacturing process.

To our understanding, this **places EUZ among the pioneers of the cyclotron-based manufacturing of Ac-225** via proton irradiation of Ra-226. The other two cyclotron-focused manufacturers that have recently communicated successful production runs are ITM (Germany) and IONETIX (United States).

Evidently, the presence of several manufacturers reporting successful production runs **validates and de-risks the cyclotron-based production route**. The improving supply security of Ac-225 is seen to embolden radiopharmaceutical developers to **strengthen their pipelines with additional candidates**.

With its acquisition of RayzeBio, **BMS got a hold of the most advanced Ac-225-based compound for the treatment of prostate cancer**. The other large pharma developers with Ac-225 compounds include AstraZeneca, Bayer, Novartis and Lilly.

Given the vast total addressable market (TAM) in oncology, several hundred thousand patients could ultimately benefit from these therapies, which **would drive the Ac-225 market well above \$ 1bn**. The first-to-market Ac-225-based therapy (from RayzeBio) could enter the market in 2028/2029.

Until then Ac-225 demand will be limited to clinical trials. **We estimate a Phase 3 trial to require >1,000 patient doses p.a.**, equivalent of 270mCi/year. EUZ's pilot production facility should be capable of **producing c. 5,000 of patient doses p.a., corresponding to c. € 15m of high-margin sales** (eHAIB). With that, EUZ could accommodate up to five Phase 3 trials from its pilot production facility.

BUY with **€ 56.5 PT** based on DCF.

Company description:

A full-service provider for radiopharmaceuticals and isotope technology for industrial applications

Company guidance 2024E:

€ 290m sales; € 60m adj EBIT

Company in a Nutshell

Eckert & Ziegler is a leading supplier of isotopes technology into a wide range of industrial applications and, increasingly, to pharmaceutical companies that develop and manufacture targeted radiation therapies. This market is projected to grow from c. \$ 7bn to \$ 39bn by 2032E, strongly driven by Lu-177- and Ac-225-based therapies as well as Ga-68-based diagnostics. All of these hard-to-get isotopes fall under EUZ's expertise. In order to capitalize on these outstanding growth prospects, EUZ is executing a major CAPEX program, which should start to increasingly contribute higher sales and earnings

Upcoming Catalysts

- Market launch of Lilly/POINT's prostate cancer drug in 2025E where EUZ is a supplier of Lu-177
- Potential FY'24 guidance beat
- Continuous onboarding of new customers for supply of medical isotopes and CMO services

Investment Case

- A well-established player in multiples attractive niches for the industrial application of isotopes, which is increasingly benefiting from a rapidly growing market for targeted radiopharmaceuticals.
- As a highly experienced supplier of isotope technology, EUZ's portfolio comprises the most sought-after medical isotopes (e.g. Ga-68, Y-90, Lu-177, Ac-225).
- Based on numerous drug launches over the next 5+ years, the market for targeted radiopharmaceuticals is seen to grow from \$ 7bn to \$ 39bn by 2032. In order to capitalize on this, EUZ has been strongly investing into the development and expansion of manufacturing and CMO capacities.
- The valuation of ~16x EV/adj EBIT'24E does not adequately account for the substantial long-term growth runway in the high-margin radiopharma vertical, in our view.
- Buy with a € 56.5 PT based on DCF.

1. General Information/Liabilities

This research report has been produced for the information purposes of institutional investors only, and is not in any way a personal recommendation, offer or solicitation to buy or sell the financial instruments mentioned herein. The document is confidential and is made available by Hauck Aufhäuser Lampe Privatbank AG, distributed in the UK through Hauck Aufhäuser IB Ltd., exclusively to selected recipients (in DE, GB, FR, CH, US, UK, Scandinavia, and Benelux or, in individual cases, also in other countries). A distribution to private investors in the sense of the German Securities Trading Act (WpHG) is excluded. It is not allowed to pass the research report on to persons other than the intended recipient without the permission of Hauck Aufhäuser Lampe Privatbank AG. Reproduction of this document, in whole or in part, is not permitted without prior permission Hauck Aufhäuser Lampe Privatbank AG. All rights reserved.

Under no circumstances shall Hauck Aufhäuser Lampe Privatbank AG, any of its employees involved in the preparation, have any liability for possible errors or incompleteness of the information included in this research report – neither in relation to indirect or direct nor consequential damages. Liability for damages arising either directly or as a consequence of the use of information, opinions and estimates is also excluded. Past performance of a financial instrument is not necessarily indicative of future performance.

2. Responsibilities

This research report was prepared by the research analyst named on the front page (the "Producer"). The Producer is solely responsible for the views and estimates expressed in this report. The report has been prepared independently. The content of the research report was not influenced by the issuer of the analysed financial instrument at any time. It may be possible that parts of the research report were handed out to the issuer for information purposes prior to the publication without any major amendments being made thereafter.

3. Organisational Requirements

Hauck Aufhäuser Lampe Privatbank AG took internal organisational and regulative precautions to avoid or accordingly disclose possible conflicts of interest in connection with the preparation and distribution of the research report. All members of Hauck Aufhäuser Lampe Privatbank AG involved in the preparation of the research report are subject to internal compliance regulations. No part of the Producer's compensation is directly or indirectly related to the preparation of this financial analysis. In case a research analyst or a closely related person is confronted with a conflict of interest, the research analyst is restricted from covering this company.

4. Information Concerning the Methods of Valuation/Update

The determination of the fair value per share, i.e. the price target, and the resultant rating is done on the basis of the adjusted free cash flow (adj. FCF) method and on the basis of the discounted cash flow – DCF model. Furthermore, a peer group comparison is made.

The adj. FCF method is based on the assumption that investors purchase assets only at a price (enterprise value) at which the operating cash flow return after taxes on this investment exceeds their opportunity costs in the form of a hurdle rate of 7.5%. The operating cash flow is calculated as EBITDA less maintenance capex and taxes.

Within the framework of the DCF approach, the future free cash flows are calculated initially on the basis of a fictitious capital structure of 100% equity, i.e. interest and repayments on debt capital are not factored in initially. The adjustment towards the actual capital structure is done by discounting the calculated free cash flows with the weighted average cost of capital (WACC), which takes into account both the cost of equity capital and the cost of debt. After discounting, the calculated total enterprise value is reduced by the interest-bearing debt capital in order to arrive at the equity value.

Hauck Aufhäuser Lampe Privatbank AG uses the following three-step rating system for the analysed companies:

Buy: Sustainable upside potential of more than 10% within 12 months

Sell: Sustainable downside potential of more than 10% within 12 months.

Hold: Upside/downside potential is limited. No immediate catalyst visible.

NB: The ratings of Hauck Aufhäuser Lampe Privatbank AG are not based on a performance that is expected to be "relative" to the market.

The decision on the choice of the financial instruments analysed in this document was solely made by Hauck Aufhäuser Lampe Privatbank AG. The opinions and estimates in this research report are subject to change without notice. It is within the discretion of Hauck Aufhäuser Lampe Privatbank AG whether and when it publishes an update to this research report, but in general updates are created on a regular basis, after 6 months at the latest. A sensitivity analysis is included and published in company's initial studies.

5. Major Sources of Information

Part of the information required for this research report was made available by the issuer of the financial instrument. Furthermore, this report is based on publicly available sources (such as, for example, Bloomberg, Reuters, VWD-Trader and the relevant daily press) believed to be reliable. Hauck Aufhäuser Lampe Privatbank AG has checked the information for plausibility but not for accuracy or completeness.
